Dashboard Design

Date	20 October 2026
S. ID	SWUID2026399918
Project Name	EV Market Performance & Insights

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features.

Here are seven potential outcomes from the dashboard image provided:

Key Findings and Insights

1. **EV Category Performance:** Compare the performance and distribution of electric vehicle categories to identify the dominant categories in the dataset.
2. **Annual Sales Trend:** Analyze yearly EV sales to understand changes in market performance over time.
3. **Manufacturer Market Share:** Compare manufacturers to identify those with a higher representation in the dataset.
4. **Battery Technology Distribution:** Examine the distribution of battery technologies to understand their contribution to the EV market.
5. **Driving Range Analysis:** Compare the average driving range across EV categories to identify differences in vehicle performance.
6. **Customer Ratings:** Analyze customer ratings by EV category to understand variations in customer feedback.
7. **Country-wise Distribution:** Compare the distribution of electric vehicles across manufacturing countries to identify major contributors.

Activity 2

Publish Dashboard on Tableau Public and Paste the Dashboard Public link below:
